EDUCATION

Drexel University

Bachelor of Science in Software Engineering (GPA: 3.15)

Philadelphia, PA

Expected June 2027

- Member, Society of Asian Scientists and Engineers
- Coursework: Database Management Systems, Data Structures and Algorithms, Software Architecture

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML, CSS, SQL, R, TypeScript, Bash

AWS and Data: AWS, PySpark, PostgreSQL, Informatica, Boomi, Atlassian Jira

Developer Tools: Git, GitHub, GitHub Actions, GitLab, Linux, IntelliJ, SQL Developer

EXPERIENCE

National Board of Medical Examiners

March 2025 - September 2026

Data Engineer Intern

Philadelphia, PA

- Built automated data pipelines using AWS Lambda and AWS Glue to move Salesforce and business data into Amazon S3 for reporting and analysis
- Automated database documentation by converting AWS Glue Data Catalog metadata into entity-relationship diagrams (ERDs), using EventBridge rules, Lambda, IAM roles, and GitHub Actions to publish updates
- Prepared and transformed datasets used by internal teams and external customers for dashboards and reporting
- Reduced Amazon S3 storage usage by 6% and storage costs by 7% through data cleanup and optimization
- Supported AWS CDK infrastructure updates through GitHub workflows, code review, and version control
- Collaborated in an Agile Scrum environment by demonstrating completed work to stakeholders and internal teams

PROJECTS

Game Desktop Application | *Python*

Software Developer/ Project Manager

- Coordinated a three-developer team through the planning, development, and release of multiple games in a shared Python application
- Created and assigned project tickets while leading sprint planning, daily stand-ups, and biweekly sprint reviews
- Tracked team progress via Atlassian Jira, coordinated GitLab workflows, and code reviews to keep the project on schedule and maintain software quality

Bank Management Simulator | *Java*

Software Developer

- Built a Java banking simulator with automated testing to improve reliability and catch defects early
- Reduced surviving code mutations by 90% through CI/CD and mutation testing, strengthening test quality
- Designed the database structure and system architecture to support secure banking operations

Personal Portfolio Website | *HTML/CSS, JavaScript*

Web Developer

- Built and deployed a responsive portfolio website with HTML, CSS, and JavaScript to showcase projects and skills
- Implemented interactive components and responsive layouts for consistent desktop and mobile experiences
- Utilized GitHub Pages to host and maintain the site for seamless deployment and version control

NutriTrack Nutrition Application | *PostgreSQL*

Full Stack Developer

- Built a full-stack nutrition tracking web app using Supabase Postgres, Supabase Auth, and a GitHub Pages frontend to log calories, macros, foods, and body weight
- Designed SQL tables with user ownership, date indexing, and Row Level Security policies to protect user data
- Added authentication and access controls so users can edit only their own health logs
